- At www.stsoftware.nl you will find more information about the advantages of this simulator.

The Jentig 50 is the showpiece of ST Software: a very stylish design finished in aluminium/black. It is equipped with large 50 inch displays in high resolution. In addition, two fast computers result in a high frame rate of 60 images per second. The images are generated with an unprecedented clarity and sharpness. This model comes with high quality pedals. The system includes all software and hardware, databases and a set of 26 lessons for driver training. The dimensions of the 50 model are 2.60x1.80 meter (w x l).
